PROFESSIONAL SUMMARY.

Portfolio: opeyemi-dev-portfolio.vercel.app

Product-oriented Full-Stack Software Engineer with over two years of experience designing and developing responsive web applications, business dashboards, and SaaS products using JavaScript, React.js, Next.js, HTML5, CSS3, and modern frontend technologies. Experienced in transforming complex business requirements into intuitive, scalable, and high-performance digital products.

Built solutions across fitness management, financial analytics, agricultural operations, and AI-powered productivity platforms, with a strong focus on user experience, performance optimization, and clean architecture. Passionate about solving real-world business problems through technology while continuously expanding into AI integrations, backend engineering, and cloud-native application development.

Recognized for delivering maintainable code, collaborating effectively with remote teams, and building products that combine excellent design with measurable business value.

WORK EXPERIENCE

Frontend Developer | [TechNova Solutions](#) — Remote

Jan 2025 – Present

- Architected and developed responsive, high-performance web applications using React.js and Next.js.
- Built reusable component libraries with React Hooks, cutting development time by 40% across projects.
- Integrated RESTful APIs and managed application state using Redux Toolkit, ensuring seamless data flow and real-time UI updates.
- Collaborated with backend developers, designers, and product managers in Agile sprints to ship features on schedule.

Stack: *React.js, Next.js, Tailwind CSS, Redux Toolkit, REST APIs, Git*

Frontend Developer (Contract) | [BrightCode Agency](#) — Remote

Jul 2024 – Dec 2024

- Designed and delivered responsive frontend interfaces for 5+ client projects including e-commerce platforms, SaaS dashboards, and corporate websites.
- Optimized page load speed through code-splitting, lazy loading, and image compression, achieving a 35% improvement.
- Maintained clean, well-documented codebases, reducing handoff friction and enabling faster onboarding of new developers.
- Worked closely with backend teams to consume and test APIs using Postman, ensuring reliable data rendering on the frontend.

Stack: *React.js, JavaScript (ES6+), CSS3, Bootstrap, Tailwind CSS, Git, REST APIs*

Junior Frontend Developer | [WebForge Creatives](#) — Remote

Jan 2023 – Jun 2024

- Developed and maintained landing pages, product catalogs, and business websites for SME clients using React and vanilla JavaScript.
- Collaborated in a team to migrate a legacy website to a React-based SPA, reducing bounce rate by 25%.
- Delivered 10+ websites across logistics, education, and retail within tight deadlines.

Stack: *HTML5, CSS3, JavaScript, React.js, Tailwind CSS, WordPress, Git*

FEATURED PROJECTS

RepurposeAI — AI Content Repurposing SaaS Platform

Live: repurpose-ai-roan.vercel.app | GitHub: github.com/Opeyemi-ojo/repurposeAI

Designed and developed an AI-inspired SaaS platform that transforms long-form content into platform-specific marketing content — social media posts, threads, captions, and promotional copy.

- Designed a modern SaaS dashboard for content generation workflows with reusable UI components.
- Simulated AI-generated outputs using structured mock data.

Tech: *HTML5, CSS3, JavaScript (ES6+)*

MeetMind — AI Meeting Intelligence Platform

Live: meet-mind-theta.vercel.app | GitHub: github.com/Opeyemi-ojo/Meetmind

Developed an AI-powered meeting assistant interface that converts discussions into concise summaries, extracts action items, highlights key decisions, and prepares multilingual insights.

- Created an intuitive workflow for AI-assisted meeting analysis with scalable dashboard architecture.
- Demonstrated future-ready SaaS product design using simulated AI responses.

Tech: *HTML5, CSS3, JavaScript (ES6+)*

NusaPalm — Agricultural Operations Management Dashboard

Live: nusa-palm.vercel.app | GitHub: github.com/Opeyemi-ojo/Nusapalm

Designed an enterprise dashboard for managing agricultural operations, inventory, production, finance, customer records, supply

- chain, and operational analytics.
- Built multiple interconnected business management modules with dynamic charts and JSON datasets.
 - Organized complex operational data into user-friendly interfaces focused on scalability.

Tech: *HTML5, CSS3, JavaScript, JSON, Chart.js, Git*

FitPulse — *Fitness Analytics Dashboard*

Live: [fit-pulse-ten.vercel.app](#) | GitHub: [github.com/Opeyemi-ojo/Fitpulse](#)

Built a responsive fitness dashboard that enables users to monitor workouts, nutrition, and fitness progress through interactive analytics and visual reporting.

- Implemented dynamic progress visualization using Chart.js across desktop and mobile layouts.
- Improved user engagement through intuitive, data-driven dashboard design.

Tech: *HTML5, CSS3, JavaScript, Chart.js*

Finova — *Personal Finance Dashboard*

Live: [finova-dashboard.vercel.app](#) | GitHub: [github.com/Opeyemi-ojo/Finova](#)

Created a financial management dashboard that helps users record transactions, monitor income and expenses, and analyze spending patterns through interactive reports and visual analytics.

- Built comprehensive financial reporting dashboards with interactive transaction charts.
- Structured the application for future API and cloud integration with responsive, usability-first layouts.

Tech: *HTML5, CSS3, JavaScript, Chart.js*

TECHNICAL SKILLS

Languages:	Tools:
JavaScript	Git,
(ES6+),	GitHub,
TypeScript,	Vercel,
HTML5,	Netlify, Vite,
CSS3	Figma, VS
Frontend:	Code,
React.js,	Postman,
Next.js,	Zoom
Redux	Practices:
Toolkit,	Responsive
Tailwind	Design, SEO,
CSS,	Accessibility
Bootstrap,	(WCAG),
Chart.js	Performance
Backend:	Optimization,
Node.js,	API
Express,	Integration,
REST APIs,	Component-
Redis,	Based
PostgreSQL,	Architecture,
MySQL,	Agile/Scrum
JSON	

EDUCATION & CERTIFICATIONS

- ND, Computer Science** — Federal School of Statistics, Nigeria (2014–2016)
- HND, Computer Science** — Federal School of Statistics, Nigeria (2018–2020)
